GateWay Router

Fast, reliable, and secure
in-vehicle mobile connectivity

The router is part of the Dejero GateWay in-vehicle mobile connectivity solution that provides fast, reliable, and secure access to the public Internet and private networks while in the field.

GateWay blends multiple cellular connections to provide carrier diversity and high throughput. The router is available in a 1U rack-mount form-factor with integrated modems that connect to external antennas positioned on the roof of your vehicle for optimal performance. The router also supports VPN tunneling for secure access to private networks.

This easy to deploy and manage solution gives field crews the ability to quickly transfer files back to the station, and enable them to edit in the field with remote access to newsroom systems and private networks—simplifying remote workflows and increasing productivity.

RELIABLE

BUILT-IN INTELLIGENCE

Our patented technology dynamically and intelligently manages multiple cellular connections in a virtual network that delivers reliable Internet access.

SPEED

FASTER CONNECTIONS

Equip your crews with fast Internet and private network access while in the field to create a more connected organization with enhanced collaboration.

SECURE

PEACE OF MIND

Dejero's technology dynamically routes packets over multiple connections, inherently providing a level of security. Establishing a VPN connection adds an extra layer of security.

CONTROL

CLOUD MANAGEMENT

Monitor performance and remotely configure GateWay routers with our cloud management system, giving you ultimate control from your web browser.
