

Airports around the globe are integrating Masterclock timing systems into their facilities, providing accurate time and simplicity. Our products utilize Network Time Protocol (NTP) technology to provide a cost-effective solution for distributing accurate time throughout a large facility, making installation and maintenance hassle-free.

### Benefits include

- All domestic and international time zones supported
- Automatic daylight saving times
- Power over Ethernet technology allows for simplified installation
- Synchronized to atomic clocks in GPS satellites with backup oscillator in event of signal loss
- Multi-functional master clocks to fit a gamut of applications
- Digital LED displays from two to eight inches in height
- Analog displays from 12 inch to 35 inch faces
- See our website for more details: [www.masterclock.com](http://www.masterclock.com)
